

# NGUYEN NGOC LINH

## Senior Platform Engineer | Kubernetes, Multi-Cloud & DevOps

San Diego, CA | 619-309-5653 | linh.hpc@gmail.com | linkedin.com/in/nguyen-ngoc-linh-6ba32a6a

Work Authorization: F-1 | Eligible for Full-Time CPT

### PROFESSIONAL SUMMARY

Senior Platform Engineer with deep production experience building and operating Kubernetes, multi-cloud infrastructure, GitOps, CI/CD, Infrastructure as Code, observability, and distributed systems. **Operated 18 production Kubernetes clusters across GCP, OCI, and AWS supporting 75 services and 250 engineers, processing up to 150K requests per minute with a 99.95% SLA.** Increased production deployment frequency by 150% to 25+ releases per week and reduced logging costs by 40%.

### TECHNICAL SKILLS

**Cloud & Containers:** AWS, GCP, OCI, Kubernetes, Docker, Helm, Kustomize, ECS, Auto Scaling

**Platform & IaC:** Terraform, Terragrunt, CloudFormation, Ansible

**CI/CD & GitOps:** GitLab CI/CD, Argo CD, Argo Rollouts, Jenkins

**Observability:** Prometheus, Grafana, Elastic Cloud on Kubernetes (ECK), Elasticsearch, Kibana, Alertmanager, New Relic, Datadog, CloudWatch

**Networking, Security & Messaging:** Cloudflare WAF, Gloo API Gateway, HAProxy, VPC, RabbitMQ (Federation, DLX/DLQ), Apache Kafka, ZooKeeper, Redis Cloud

**Languages & Scripting:** Python, Go, Bash, Linux

### PROFESSIONAL EXPERIENCE

**Tamara | Ho Chi Minh City, Vietnam**

**Jan 2021 – Feb 2025**

**Senior DevOps Engineer**

- Designed and operated 18 production Kubernetes clusters (16 GCP across 5 vertical teams, 1 OCI, and 1 AWS DR cluster), supporting 75 services and 250 engineers.
- Operated highly available fintech workloads processing up to 150K requests per minute while supporting a 99.95% SLA.
- Architected multi-cloud infrastructure across AWS, GCP, and OCI with Terraform and Terragrunt, standardizing provisioning and reducing configuration drift.
- Migrated production delivery from Kubernetes Rolling Updates to Argo Rollouts canary releases; combined GitLab CI/CD and GitOps to increase deployment frequency by 150% to 25+ production releases per week.
- Integrated Argo Rollouts with New Relic scorecards to track delivery performance using DORA metrics and support progressive-delivery decisions.
- Designed and operated a self-hosted ECK observability platform with Elasticsearch, Kibana, Prometheus, Grafana, and Alertmanager, improving centralized monitoring and troubleshooting.
- Installed, configured, and operated RabbitMQ for application messaging, implementing federation across OCI and GCP and dead-letter exchanges/queues (DLX/DLQ) for failed-message handling and retry workflows.
- Configured Cloudflare WAF for payment endpoints and the main API; managed Gloo API Gateway and Redis Cloud for secure traffic management, rate limiting, caching, and low-latency workloads.

**DEK Technologies | Ho Chi Minh City, Vietnam****Aug 2020 – Dec 2020****Senior System Engineer**

- Deployed and operated enterprise-grade CDN platforms supporting global customers and low-latency content delivery.
- Built and maintained Apache Kafka and ZooKeeper infrastructure for event-driven applications and real-time data pipelines.
- Automated Kafka and ZooKeeper deployments with Red Hat Ansible, standardizing configurations and accelerating infrastructure delivery by up to 170%.
- Managed multi-cloud infrastructure across AWS, OCI, and GCP using Terraform/Terragrunt, Kubernetes, Helm, Kustomize, GitLab CI, and Argo CD; maintained Elasticsearch/Kibana/Fluent Bit logging for RCA.

**Sezax Vietnam | Ho Chi Minh City, Vietnam****Jul 2019 – Jul 2020****Senior DevOps Engineer**

- Automated AWS infrastructure provisioning with CloudFormation across VPC, S3, ALB, IAM, Cognito, SES, SNS, and SQS.
- Operated containerized workloads using Docker, ECS, and EC2 and developed Jenkins CI/CD pipelines for automated application delivery.
- Migrated AWS audit and infrastructure logging to a self-hosted Kubernetes-based Graylog platform using Fluent Bit, reducing bandwidth and storage costs by 40%.
- Integrated AWS CloudTrail, Datadog, Grafana, CloudWatch, and Graylog to strengthen monitoring, auditing, and production troubleshooting.

**Dell EMC | Penang, Malaysia****Jan 2017 – Dec 2018****Technical Support Specialist, Enterprise TAC**

- Provided Tier-3 enterprise support for Dell bare-metal servers, SAN/NAS storage, Linux, and networking environments.
- Diagnosed complex hardware, storage, Linux, and infrastructure issues for global enterprise customers.
- Participated in 24/7 incident response and RCA with R&D and Solution Architects to restore critical services and prevent recurring failures.

**KDDI | Ho Chi Minh City, Vietnam****Jun 2012 – Jan 2016****System Engineer**

- Designed and maintained enterprise server, storage, networking, firewall, VLAN, VPN, and data-center infrastructure across customer environments.
- Designed a Synology NAS backup and disaster-recovery architecture for Dell server environments using local NAS storage with automated synchronization to remote sites.
- Reduced backup infrastructure costs by 45% while improving off-site data protection, redundancy, recovery reliability, and operational resilience.
- Administered routers, Layer 2/3 switches, firewalls, RAID systems, and Site-to-Site VPN connectivity across multiple customer sites.

**EDUCATION**

---

**Trine University** | M.S. in Information Studies | Phoenix, AZ | Expected 2028

Relevant Coursework: Cloud Computing Architecture, Information Security

**Ho Chi Minh City University of Technology and Education** | Bachelor of Mechanical Engineering**NIIT Thu Duc** | Diploma in Network Engineering – Microsoft Technologies**CERTIFICATIONS**

---

- Certified Kubernetes Administrator (CKA) – Linux Foundation
- AWS Certified Solutions Architect – Associate – Amazon Web Services
- IBM z/OS Container Extensions Practitioner – IBM
