NGUYEN NGOC LINH

Senior DevOps Engineer | Senior Platform Engineer

San Diego, CA | 619-309-5653 | linh.hpc@gmail.com | linkedin.com/in/nguyen-ngoc-linh-6ba32a6a
Work Authorization: F-1 | Eligible for Full-Time CPT

PROFESSIONAL SUMMARY

Senior DevOps and Platform Engineer with experience running Kubernetes and cloud infrastructure across AWS, GCP, and OCI. Built deployment pipelines, database migration scripts, and internal workflows for engineering teams. At Tamara, supported 75 services and 250 engineers across 18 production clusters.

TECHNICAL SKILLS

Cloud & Containers: AWS, GCP, OCI, Kubernetes, Docker, Helm, Kustomize, ECS, Auto Scaling
IaC & Automation: Terraform, Terragrunt, CloudFormation, Ansible, Backstage, n8n, Jira
CI/CD & GitOps: GitLab CI/CD, Argo CD, Argo Rollouts, Jenkins
Observability: Prometheus, Grafana, ECK, Elasticsearch, Kibana, Alertmanager, New Relic, Datadog, CloudWatch
Data Platforms: MySQL, PostgreSQL, Redis Cloud, BigQuery, CDC, RabbitMQ, Kafka, ZooKeeper
Systems & Security: Linux, Cloudflare WAF, Gloo API Gateway, HAProxy, VPC, IPsec VPN
Languages & Scripting: Python, Go, Bash

PROFESSIONAL EXPERIENCE

Tamara | Ho Chi Minh City, Vietnam **Jan 2021 – Feb 2025**
Senior Platform Engineer **Apr 2023 – Feb 2025**

- Used Backstage and Terraform to automate internal requests and provisioning for Redis, MySQL, and PostgreSQL resources.
- Created more than 40 MySQL clusters in GCP and migrated data from OCI using GTID replication, IPsec VPN tunnels, and GCP external replication. Completed the migration in one day, with gcloud and OCI CLI scripts running across all clusters in under 30 minutes.
- Set up MySQL and PostgreSQL replicas for change data capture (CDC) into Google BigQuery. Supported business and analytics teams with more reliable data as they moved away from Apache Superset.
- Set up managed Apache Kafka on GCP, including broker and producer configuration for Go and Rust applications.
- Connected n8n with Jira to automate internal support workflows.
- Managed Redis Cloud for application caching and low-latency workloads.

Senior DevOps Engineer **Jan 2021 – Mar 2023**

- Designed and operated 18 production Kubernetes clusters: 16 on GCP across 5 teams, 1 on OCI, and 1 on AWS for disaster recovery. Supported 75 services and 250 engineers, with workloads reaching 150K requests per minute and a 99.95% SLA.
- Built and maintained AWS, GCP, and OCI infrastructure with Terraform and Terragrunt, using consistent provisioning workflows to limit configuration drift.
- Moved from Kubernetes rolling updates to canary releases with Argo Rollouts, GitLab CI/CD, and GitOps. Production deployments increased by 150% to 25+ per week. Used New Relic scorecards to track DORA metrics.
- Ran Elasticsearch and Kibana through Elastic Cloud on Kubernetes (ECK), alongside Prometheus, Grafana, and Alertmanager for logging, monitoring, and troubleshooting.
- Configured RabbitMQ federation between OCI and GCP, with dead-letter exchanges and queues (DLX/DLQ) to handle failed messages and retries.
- Configured Cloudflare WAF for payment endpoints and the main API. Managed Gloo API Gateway for traffic routing and rate limiting.

DEK Technologies | Ho Chi Minh City, Vietnam **Aug 2020 – Dec 2020**
Senior System Engineer

- Deployed and maintained CDN platforms serving global customers, with a focus on low-latency content delivery.
- Built Kafka and ZooKeeper infrastructure for event-driven applications and real-time data pipelines. Automated deployments with Red Hat Ansible, improving infrastructure delivery speed by up to 170%.
- Managed AWS, OCI, and GCP infrastructure using Terraform, Terragrunt, Kubernetes, Helm, and Kustomize. Used GitLab CI and Argo CD for deployments, and Elasticsearch, Kibana, and Fluent Bit for logs and root cause analysis.

Sezax Vietnam | Ho Chi Minh City, Vietnam **Jul 2019 – Jul 2020**
Senior DevOps Engineer

- Provisioned AWS resources with CloudFormation, including VPC, S3, ALB, IAM, Cognito, SES, SNS, and SQS.
- Ran containerized applications on Docker, ECS, and EC2. Built Jenkins pipelines to automate application deployments.
- Moved AWS audit and infrastructure logs to a self-hosted Graylog platform on Kubernetes using Fluent Bit, cutting bandwidth and storage costs by 40%.
- Integrated CloudTrail, Datadog, Grafana, CloudWatch, and Graylog for auditing, monitoring, and production troubleshooting.

Dell EMC | Penang, Malaysia **Jan 2017 – Dec 2018**
Technical Support Specialist, Enterprise TAC

- Provided Tier-3 support for Dell bare-metal servers, SAN/NAS storage, Linux, and networking. Troubleshot infrastructure issues for enterprise customers worldwide.
- Participated in 24/7 incident response and root cause analysis with R&D and Solution Architects to restore services and address recurring failures.

KDDI | Ho Chi Minh City, Vietnam **Jun 2012 – Jan 2016**
System Engineer

- Designed and maintained server, storage, and data-center infrastructure for customers. Administered routers, Layer 2/3 switches, firewalls, VLANs, RAID, and site-to-site VPNs.
- Built a Synology NAS backup and disaster-recovery setup for Dell servers, with automated synchronization to remote sites. Reduced backup infrastructure costs by 45% while improving off-site data protection and recovery reliability.

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA) – Linux Foundation
- AWS Certified Solutions Architect – Associate – Amazon Web Services
- IBM z/OS Container Extensions Practitioner – IBM

EDUCATION

Trine University | M.S. in Information Studies | Phoenix, AZ | Expected 2028
Relevant Coursework: Cloud Computing Architecture, Information Security

Ho Chi Minh City University of Technology and Education | Bachelor of Mechanical Engineering

NIIT Thu Duc | Diploma in Network Engineering – Microsoft Technologies
