

NGUYEN NGOC LINH

Senior DevOps Engineer | Senior Platform Engineer

San Diego, CA | 619-309-5653 | linh.hpc@gmail.com | linkedin.com/in/nguyen-ngoc-linh-6ba32a6a

Work Authorization: F-1 | Eligible for Full-Time CPT

PROFESSIONAL SUMMARY

Senior DevOps and Platform Engineer focused on Kubernetes operations, Infrastructure as Code, CI/CD and GitOps, observability, and internal platform automation across AWS, GCP, and OCI. Supported 18 production clusters, 75 services, and 250 engineers at Tamara. Experience spans developer tooling, database migration and CDC, Redis Cloud, and production incident response.

TECHNICAL SKILLS

Cloud & Containers: AWS, GCP, OCI, Kubernetes, Docker, Helm, Kustomize, ECS, Auto Scaling

IaC & Automation: Terraform, Terragrunt, CloudFormation, Ansible, Backstage, n8n, Jira

CI/CD & GitOps: GitLab CI/CD, Argo CD, Argo Rollouts, Jenkins

Observability: Prometheus, Grafana, ECK, Elasticsearch, Kibana, Alertmanager, New Relic, Datadog, CloudWatch

Data Platforms: MySQL, PostgreSQL, Redis Cloud, BigQuery, CDC, RabbitMQ, Kafka, ZooKeeper

Systems & Security: Linux, Cloudflare WAF, Gloo API Gateway, HAProxy, VPC, IPsec VPN

Languages & Scripting: Python, Go, Bash

PROFESSIONAL EXPERIENCE

Tamara | Ho Chi Minh City, Vietnam

Jan 2021 - Feb 2025

Senior Platform Engineer

Apr 2023 - Feb 2025

- **Platform provisioning:** Automated internal requests and provisioning for Redis, MySQL, and PostgreSQL resources with Backstage and Terraform.
- **Cloud migration automation:** Created more than 40 MySQL clusters in GCP and migrated data from OCI using GTID replication, IPsec VPN tunnels, and GCP external replication. Completed the migration in one day; gcloud and OCI CLI scripts ran across all clusters in under 30 minutes.
- **Redis Cloud:** Managed Redis Cloud for application caching and low-latency workloads.
- **n8n / Jira:** Integrated n8n with Jira to automate internal support workflows.
- **CDC / BigQuery:** Set up MySQL and PostgreSQL replicas for change data capture into Google BigQuery, supporting business and analytics teams with more reliable data as they moved away from Apache Superset.

Senior DevOps Engineer

Jan 2021 - Mar 2023

- **Kubernetes operations:** Designed and operated 18 production clusters: 16 on GCP across 5 teams, 1 on OCI, and 1 on AWS for disaster recovery. Supported 75 services and 250 engineers, with workloads reaching 150K requests per minute and a 99.95% SLA.
- **Infrastructure as Code:** Built and maintained AWS, GCP, and OCI infrastructure with Terraform and Terragrunt, standardizing provisioning workflows to limit configuration drift.
- **CI/CD and GitOps:** Moved rolling updates to canary releases with Argo Rollouts, GitLab CI/CD, and GitOps. Increased production deployment frequency by 150% to 25+ releases per week; used New Relic scorecards to track DORA metrics.
- **Observability:** Ran Elasticsearch and Kibana through ECK alongside Prometheus, Grafana, and Alertmanager for centralized logging, monitoring, and production troubleshooting.
- **Messaging reliability:** Configured RabbitMQ federation between OCI and GCP, with dead-letter exchanges and queues (DLX/DLQ) for failed-message handling and retries.
- **API security and traffic:** Configured Cloudflare WAF for payment endpoints and the main API; managed Gloo API Gateway for routing and rate limiting.

DEK Technologies | Ho Chi Minh City, Vietnam
Senior System Engineer

Aug 2020 - Dec 2020

- **Deployment automation:** Built Kafka and ZooKeeper infrastructure for event-driven applications and real-time data pipelines. Automated deployments with Red Hat Ansible, improving infrastructure delivery speed by up to 170%.
- **Cloud infrastructure:** Managed AWS, OCI, and GCP environments using Terraform, Terragrunt, Kubernetes, Helm, and Kustomize.
- **Delivery and diagnostics:** Used GitLab CI and Argo CD for deployments, and Elasticsearch, Kibana, and Fluent Bit for logging and root-cause analysis.
- **CDN operations:** Deployed and maintained CDN platforms serving global customers, with a focus on low-latency content delivery.

Sezax Vietnam | Ho Chi Minh City, Vietnam
Senior DevOps Engineer

Jul 2019 - Jul 2020

- **Infrastructure as Code:** Provisioned AWS resources with CloudFormation, including VPC, S3, ALB, IAM, Cognito, SES, SNS, and SQS.
- **Containers and CI/CD:** Operated applications on Docker, ECS, and EC2; built Jenkins pipelines to automate application deployments.
- **Logging and cost optimization:** Moved AWS audit and infrastructure logs to self-hosted Graylog on Kubernetes using Fluent Bit, reducing bandwidth and storage costs by 40%.
- **Production monitoring:** Integrated CloudTrail, Datadog, Grafana, CloudWatch, and Graylog for auditing, monitoring, and troubleshooting.

Dell EMC | Penang, Malaysia
Technical Support Specialist, Enterprise TAC

Jan 2017 - Dec 2018

- **Incident response and RCA:** Participated in 24/7 incident response and root-cause analysis with R&D and Solution Architects to restore services and address recurring failures.
- **Enterprise infrastructure:** Provided Tier-3 support for Dell bare-metal servers, SAN/NAS storage, Linux, and networking, troubleshooting infrastructure issues for enterprise customers worldwide.

KDDI | Ho Chi Minh City, Vietnam
System Engineer

Jun 2012 - Jan 2016

- **Backup automation and recovery:** Built a Synology NAS backup and disaster-recovery setup for Dell servers with automated synchronization to remote sites. Reduced backup infrastructure costs by 45% while improving off-site data protection and recovery reliability.
- **Infrastructure operations:** Designed and maintained server, storage, and data-center infrastructure. Administered routers, Layer 2/3 switches, firewalls, VLANs, RAID, and site-to-site VPNs across customer environments.

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA) - Linux Foundation
- AWS Certified Solutions Architect - Associate - Amazon Web Services
- HashiCorp Terraform Authoring and Operations Advanced with AWS
- IBM z/OS Container Extensions Practitioner - IBM

EDUCATION

Trine University | M.S. in Information Studies | Phoenix, AZ | Expected 2028
Relevant Coursework: Cloud Computing Architecture, Information Security

Ho Chi Minh City University of Technology and Education | Bachelor of Mechanical Engineering

NIIT Thu Duc | Diploma in Network Engineering - Microsoft Technologies
